

Ideation Phase

Define the Problem Statements

Date	04-10-2026
Team ID	SWTID-2026-9856
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with a 4-6 word phrase (e.g., "a traveler").	Describe the customer and their attributes here
I'm trying to	List the thing they are trying to achieve here	List the thing they are trying to achieve here
but	Describe the problems or barriers that get in the way here	Describe the problems or barriers that get in the way here
because	Enter the "root cause" for why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view here (e.g., "frustrated").	Describe the emotions the result from experiencing the problems or barriers

Example:

I am	I'm trying to	but	because	which makes me feel
an IT support agent	classify incoming support tickets quickly and accurately	manually reviewing and categorizing every ticket takes time	tickets arrive in large volumes with different issues and descriptions	overwhelmed and delays ticket routing

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	IT support agent	I'm trying to classify incoming support tickets quickly and accurately	But manually reviewing and categorizing every ticket takes time and can lead to inconsistent classifications	Because tickets arrive in large volumes with different issues and descriptions	Which makes me feel overwhelmed and delays ticket routing.
PS-2	IT support team	I'm trying to route each ticket to the correct category and support group automatically	But tickets are often misclassified or sent to the wrong team	Because there is no consistent automated classification workflow	Which makes me feel frustrated and reduces response efficiency.
